Top differences between Example Primary School and Nottingham City Primary

Key:	Interpretation
🟢 - Significantly better than N City average	In the chart below a coloured circle represents Example Primary School's result, while the black line represents the mean for N City. The distance between the circle and the black line indicates the size of the difference between the percentages – the greater the gap, the larger the difference.
🔵 - Not significantly different	The colour of the circle reflects whether a difference is statistically significant and if the difference is positive (green), negative (red) or if it is not statistically significant (blue).
🔴 - Significantly worse than N City average
